

## Peptone, Bacteriological

### Intended Use

A nutritious ingredient used in the preparation of culture media for the cultivation of a wide variety of bacteria and fungi.

### Summary and Principle

Peptone is used as an organic nitrogen source in microbiological culture media for cultivation of a variety of bacteria and fungi. It contains nitrogen in a form that is readily available for bacterial growth. It also has high peptone and amino acid content, with only a negligible quantity of proteoses and more complex nitrogenous constituents.

### Storage and Stability

Store between 10 - 30°C in tightly closed container and away from bright light. Avoid freezing and overheating. Use before expiry date on the label. Once opened keep powdered medium closed to avoid hydration.

**Note:** TSE/BSE certificate is available on request.

### Directions

Refer to the final concentration in the formula of the medium being prepared.
