

Saline

Intended Use

Saline is a diluent used for raw material and finished product testing.

Summary

Saline has been recommended by various manufacturers and authors for preparing test suspensions of organisms to help maintain bacterial cell integrity and viability. Saline is recommended by Clinical and Laboratory Standards Institute (CLSI) for preparation of bacterial suspension used for susceptibility testing.

Principle

This medium lack properties that may interfere with biochemical reaction and/or antibiotic susceptibility tests. The sodium chloride concentration in saline (0.85%) provides osmotic protection for microbial cells.

Formula *

Ingredients	g/L
Sodium Chloride	9.0
Final pH (at 25°C)	7.0 ± 0.5

*Adjusted to suit performance parameters.

Directions

1. Bring the saline vial/bottle to the room temperature 22°C-30°C.
2. Use saline as per required application.

Quality Control

Appearance: Clear, colourless solution.

Storage and Stability

1. Store the ready to use saline at 15°C-25°C in a cool, dry place away from light.
2. Stability of the kit is as per expiry date mentioned on the label.

Warranty

This product is designed to perform as described on the label and package insert. The manufacturer disclaims any implied warranty of use and sale for any other purpose.
